## SUNGEI RAMAL.

The net profit for the year of Sungei Ramal Syndicate Ltd., after providing for depreciation and manager's commission, is \$33,755, to which falls to be added \$26,397 brought forward from the previous year, making a sum of \$60,152 available, which the directors recommend be dealt with as follows:—Payment of a dividend of 2½ per cent., absorbing \$10,000; carry forward (subject to the payment of directors' fees) \$50,152.

The crop harvested for the year was 386,303 lb. and realised an average price of 24.48 cts. or 6.85d. per lb. The A.B.C. system on a "V" on half the tree, tapped alternate daily, is in force, whereby a third of the mature area is being rested in rotation. The average area tapped during the year was 562½ acres, giving an average yield for eleven months of 687 lb. per acre over the tapped area. No tapping took place in May in compliance with the R.G.A. proposal for a tapping holiday. The sheet produced is of good quality.

The estate continues to be very free from pests and diseases. The chief labour continues to be non-resident Chinese and a sufficient supply is available. Health continues to be good. Mr. A. P. Mackilligin paid regular quarterly visits to the estate and in his last report states that the condition has shown marked improvement during the past year and that it is in very good order throughout. Mining rights have been obtained over approximately seven acres but in view of the depression in the industry, further development of this proposition is held in abeyance.

The resolutions for the increase of capital and the capitalisation of the reserve fund and issue of 200,000 shares pro rata to the shareholders, as set out in the circular dated Nov. 25, 1929, were duly passed and confirmed, and action taken thereon as has already been notified to the shareholders. The issued capital of the company now stands at 400,000 shares of \$1 each fully paid.
