I got a hint from a friend confirming the old Colonial architecture at the end of stadium should be the Kajang Recreation Club established in 1895. It was used as RTM store for the past decades. In the Selangor Journal published in 1890s, the British planters and Colonial officials set up the Club and hence the road leading from town to the open field and the Club was named Club Road (Jalan Kelab now). This historical building should be preserved and restored. Isn't it good if the building were to be restored and be converted into public place such as gallery or heritage centre.

I believe prior to it being a store, it was an RTM station manning the radio mast nearby. The club may be somewhere else.

**SZ Abidin**  
architecturally it doesn't appear it is even from the turn of the century. Mid 1950 perhaps ?

Beautiful piece, mixed of modernist and Malaysian vernacular I would say. Great potential
