

Sapura Industrial Berhad is Malaysia's leading technology company and is at the forefront of knowledge and technology

About Us

Corporate HQ & Stabiliser Bar Plant, Bangi.

1984 - Acquisition of Coil Spring Plant, Port Klang.

Corporate Profile

Honourable, Professional, Resourceful, Resilient and Agile - These are values that make us who we are today - We endlessly research and develop superior products to meet our customers' expectations. Sapura Industrial Berhad [Registration No: 197401000510 (17547-W)] started its business in automotive components manufacturing in the early 1980s through an

acquisition of a coil spring business from Henderson's Ltd, Australia.

Taking off from just the coil spring – Sapura Industrial has since expanded its business to include the manufacture of high value-added machined engine, transmission & brake components as well as stabiliser bars and chassis module assemblies for the automotive industry and cold drawn high-grade structured steel bars used in the automotive, electrical & electronics industries.

As the business expanded in tandem with Malaysia's automotive industry, Sapura Motors Berhad was established in 1994 and subsequently listed on the Second Board of Bursa Malaysia Securities Berhad in 1997. The Company was transferred to the Main Board in 2004 and renamed Sapura Industrial Berhad, to reflect its diverse business activities.

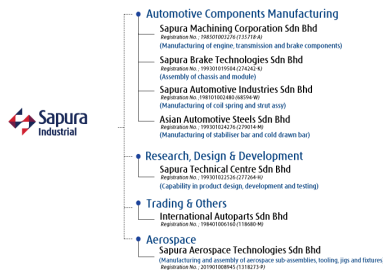

Vision

To Create Indigenous Technological Platforms Through Entrepreneurship That Propagates Technical Competence Resulting In Sustainable Profits.

Mission

Our Goal is to be Technology Competent and Distinctive in our Area of Business by Providing Solutions that Exceed Customers' Expectations through Professional Leadership and Consistently Deliver improved Performance.

Core Expertise

High Precision Machining

Sapura Machining Corporation Sdn Bhd [Registration No: 19850003276 (135718-A)] manufactures high-value precision parts that include engine, transmission and brake related components for the automotive industry. We have invested in the latest testing equipment to ensure we meet the strictest quality standards, without compromising on cost-effectiveness and efficiency. In Malaysia, we are an established supplier of critical safety items such as brake disc fronts, brake drum rears and front hubs with an anti-lock braking system (ABS) for the domestic market. Our customer base includes the national car makers and also many of the OEMs with operations in Malaysia such as Honda and Mazda.

Chassis & Module Assembly

Sapura Brake Technologies Sdn Bhd [Registration 199301019504 (274242-K)] is rapidly becoming one of the major brake systems and modular supplier in the region. Working closely with our technical partners such as Japans Advics Co. Ltd and Erae formerly known as Korea Daejeon Automotive Systems Corporation (KDAC), we are able to meet the exacting requirements of brake systems in the latest models with innovative products such as our Front and Rear Corner Modules. We have also progressively moved up the value chain to produce high-end and high-value assembly components for the manufacturing of finished modules.

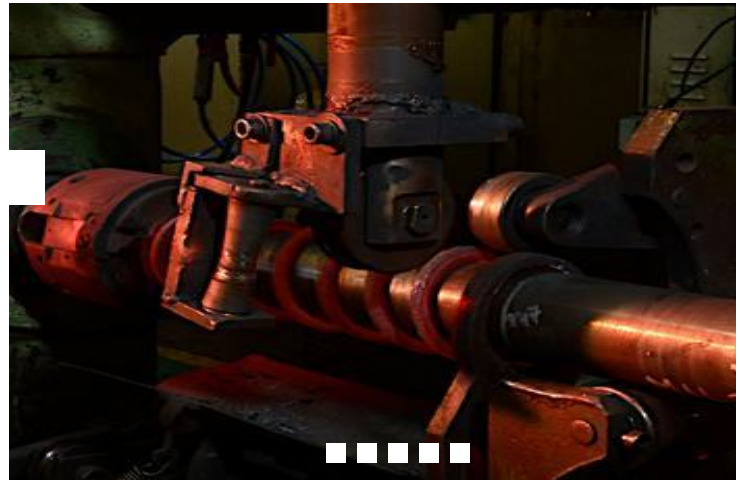

Hot & Cold Forming

Sapura Automotive Industries Sdn Bhd [Registration No: 198101002480 (68594-W)]
(Coil spring & Strut Assembly)

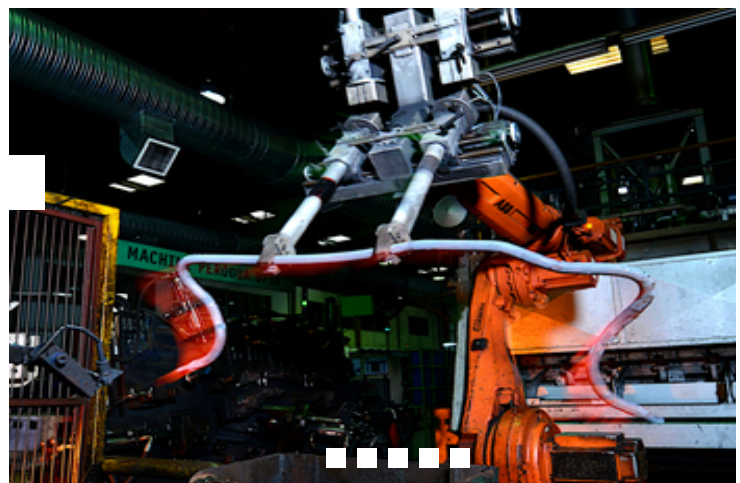

Asian Automotive Steels Sdn Bhd [Registration No: 199301024276 (279014-M)]
(Stabiliser bar & Cold Drawn Bar)

We are a leading supplier of suspension systems in Malaysia to reputable OEMs such as Proton, Perodua, Honda and Mazda, Volvo and Kayaba and export markets such as Thailand, India and Ecuador. From the production of high quality coil springs, strut assemblies and stabiliser bars, our expertise extends to design integration, working closely with the respective car manufacturers to meet their specific requirements.

Leveraging on the knowledge and experience of our technical partners, we have consolidated and nurtured a technical base over the years. We now have capabilities in our manufacturing process to use both hot and cold forming technology to produce advanced, high strength steel components that have become the staple of the modern automotive industry. To meet the growing trend towards Energy Efficient Vehicles, we have also developed in-house capabilities to produce hollow stabiliser bars for a vehicle's suspension system, which weighs less while providing almost the same functionality as a conventional stabiliser bar.

Research & Development

Sapura Technical Centre Sdn Bhd [Registration 199301022526 (277264-H)] strength lies in our capability both a design and research & development (R&D) centre. This dual advantage allows us to develop technical technological products that are coupled with state-of-the-art evocative design integration. In line with the fast-paced technology, Sapura Industrial's in-house R&D facility ensures that the entire company is kept abreast with the latest technical and technological advancements and know-how. Design & Development capabilities include: CAD software, product simulation & analysis, product development, prototyping, design & fabrication for factory automation. Product Testing facilities include: 6-axis tester, hydraulic servo, fatigue tester, CMM, hardness tester.

Trading

At International Autoparts Sdn Bhd [Registration No: 198401006160 (118680-M)], we supply a full range of superior quality replacement parts to keep your foreign and domestic nameplate vehicles in top working order. We distribute our products through wholesale distributors across Malaysia and Indonesia. We pride ourselves in providing premium quality products at competitive prices while delivering the best customer service in the industry.
