There are now buildings there 700 by 50? feet in extent which have been completed, and these cover an area of 35,000 square feet. At present there is a stable with 20 stalls and an 8 feet verandah nearing completion. When it is borne in mind that, at the end of last month, there was not a sign of any building at the place referred to, it speaks well, says the Malay Mail, for the energy displayed by the Engineer in charge of the work, Mr. H.R. Moullin, of the P.W.D. Factory. All the workmen employed in the place are Chinese mining-kongsi builders, who are well adapted for the kind of work in question, and it is no doubt owing to the engagement of this class of men that the work of construction has progressed so rapidly.”* (Straits Echo, 29 June 1908, Page 6:
